

FLOW DIRECTION

pH-TREATTM

4720-06

pH Neutralizer

For Neutralizing Acid Condensate from High Efficiency
Furnaces, Boilers, and Tankless Water Heaters

Service Life: **1 Year or when out flow pH level moves below 6**

Temperature Range: **40 to 100 degrees F (4.4-37.8 C)**

Pressure Range: **0-125 psi**

Application Gravity Flow: Follow Local Code Requirements for Discharge of Condensate. Install in a vertical position below condensate collection tank level. Avoid obstructions as condensate could be damaging to surrounding surfaces and articles. No warranty is made or implied to damage caused by condensate.
