

TREATMENT DESIGNED FOR SMALL COOLING TOWERS & EVAPORATIVE CONDENSERS

- Prevents scale and corrosion
- Environmentally Safe
- One charge lasts one season (6 months)
- Biodegradable
- Easy-to-use... one container treats 10 tons of cooling capacity (for corrosion, use one container per 5 tons)

Description

This flow-through package design makes it simple to treat your tower water and prevent scale and the associated problems that go along with it. It's as simple as unwrapping the package and placing it into the sump in an area of good water flow. Once you've begun treatment, set the bleed at 1/6 gpm for every 10 tons of capacity and forget about it until next year... the treatment lasts the entire season.

Packaging

Season Treat **4364-88**

Read and understand the product's label and Safety Data Sheet ("SDS") for precautionary and first aid information.

The SDS is available on the Nu-Calgon website at www.nucalgon.com.
